MARINE PRODUCTS

Application:

Use 1 ounce of **Elite Boat Wash** in 1 gallon of water for routine cleaning. Reduce dilution rate if desired. Once Boat Wash and water is in the bucket, agitate solution with your cleaning brush or wash mitt to generate additional suds. Clean the surface with a soft brush or wash mitt. Rinse surface thoroughly with fresh water.

Elite Boat Wash offers superior penetration and removal of soot, salt, stains, dirt, oil and other contaminants. Its advanced surfactant chemistry provides exceptional cleaning power and lubrication for physical agitated cleaning. It is suitable for high temperature applications and has a low streak/smear profile. This product is highly concentrated; **safe for ceramic coating, waxes and other surface treatments** and is stable when in contact with acids and alkali. One gallon of concentrate makes 128 gallons of boat wash.

DITEC believes that the environment is our most precious asset. Our cleaning products are readily biodegradable, free of harsh and harmful chemical ingredients and comprised of environmentally responsible raw materials, protecting the marine ecosystem and all that inhabit it. Our cleaning products are classified as 'not a marine pollutant'. Our full line of protection products and their performance are unsurpassed in the marine industry.
