

## Glass Polishing Pads

### **Proprietary Glass Polishing Pads:**

Effectively level and remove light scratches, water spots and other stubborn imperfections.

- Fast cutting, low heat and easy polishing
- Compressed material remains porous enough to help absorb the compounding material and avoid wasteful product sling.
- Capable of polishing out to a clear finish.
- Can be used with a rotary or dual action polisher.

### **How to Use:**

Always keep surface wet to prevent overheating which may cause distortion or even cracking.

### **For Best Results:**

- ROTARY: RPM's between 1,000 - 1,500
- DUAL ACTION: OPM's between 3,000 - 4,500

### **Part Numbers:**

- 5" - LC-GLAS-PAD1
