

DITEC Teak Magic

DITEC's Teak Magic series is a safe and effective, non-toxic, organic and eco-friendly **alternative** to using phosphoric acid or other caustic cleaners. This **two-part** cleaner is specially engineered to not destroy your teak or wood surface, instead it safely cleans and brings teak decks and wood furniture to their natural color and brightness. Its gel consistency makes it ideal for controlled application. **This product may be safely discharged into rivers, streams, oceans and other waterways, when used as directed.** (Teak Magic is a preservation and maintenance product, not a restoration product. Teak Magic is not a substitute for sanding and repairing heavily distressed teak decks.)

Teak Magic: Part 1 (Cleaner)

For deep or heavy-duty cleaning of all teak surfaces, including large teak decks and teak furniture. Ideal for use in areas with sensitive surroundings (including finished metals). If product comes in contact with soft metals (aluminum, brass, etc) rinse off with water immediately.

PRODUCT SPECIFICATION:

Appearance: Baby Blue Gel
Odor: Odorless
Solubility: 100% in water
pH: 14

ENVIRONMENT:

- MARPOL Annex III and Annex V compliant
- REACH compliant
- Ready biodegradable (After 10 days)
- Phosphate free
- Non-corrosive when used as directed

SIZES:

Quart (32 oz), Gallon (128 oz)

APPLICATION DIRECTIONS:

Step 1: Apply Teak Magic: Part 1 (Cleaner)

Make sure to wear proper safety gear, including nitrile gloves. For best results apply DITEC Teak Magic Part 1 to a damp surface.

1. In a clean bucket, mix one part Teak Magic Part 1 with four parts fresh water (1:4). Spread product completely and evenly onto the surface using a foam brush, deck brush or polypropylene scrub pad.
2. Allow Part 1 to dwell on the surface for 3-5 minutes.
3. Using a medium polypropylene scrub pad, make sure to scrub the teak with and against the wood grain with medium pressure to loosen dirt or contaminant particles.
4. Be sure to thoroughly rinse dirt and product off the teak with fresh water, including areas like cleats or scuppers where dirty water/product may flow and puddle up. Then apply Teak Magic Part 2 (Brightener).

Teak Magic: Part 2 (Brightener)

For deep or heavy-duty cleaning of all teak surfaces, including large teak decks and teak furniture. Ideal for use in areas with sensitive surroundings (including finished metals). If product comes in contact with soft metals (aluminum, brass, etc) rinse off with water immediately.

PRODUCT SPECIFICATION:

Appearance: Pink Gel

Odor: Odorless

Solubility: 100% in water

pH: <1

ENVIRONMENT:

- MARPOL Annex III and Annex V compliant
- REACH compliant
- Ready biodegradable (After 10 days)
- Phosphate free
- Non-corrosive when used as directed

SIZES:

Quart (32 oz), Gallon (128 oz)

APPLICATION DIRECTIONS:

Step 2: Apply Teak Magic Part 2 (Brightener)

Make sure to wear proper safety gear, including nitrile gloves.

1. After thoroughly and completely rinsing off Teak Magic Part 1, remove excess puddles of water. Surface should be damp. In a clean bucket, mix one part Teak Magic Part 2 with four parts fresh water (1:4).
2. Apply Part 2 to the damp surface. Spread product completely and evenly onto the surface using a foam brush, soft bristle deck brush or medium polypropylene scrub pad. There is no need to scrub the product in this step, let the product do the work.
3. Allow Part 2 to dwell on the surface for 3-5 minutes.
4. After teak has brightened, rinse the surface thoroughly with fresh water, including areas like cleats or scuppers where dirty water/product may flow and puddle up, to ensure the product is entirely off the surface. Remove excess water and allow teak to dry.

When teak is completely dry and cool, apply **DiTEC Triton 2.0** to protect (for up to 3-6 months) against dirt, UV, rain, salt, oil, and food and beverage stains.

NOTE: Teak Magic is not an alternative to sanding! Decks that are extremely gray, have severe mold, mildew, or algae, or have very deep grain structure, will require sanding to achieve a level and clean surface. DiTEC Marine Products are maintenance and preservation products, NOT restoration products.
